PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.READ_SYNC_SETTINGS	normal	read sync settings	Allows an application to read the sync settings, such as whether sync is enabled for Contacts.
com.android.launcher.permission.UNINSTALL_SHORTCUT	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.USE_CREDENTIALS	dangerous	use the authentication credentials of an account	Allows an application to request authentication tokens.
android.permission.ACCESS_COARSE_LOCATION	dangerous	coarse (network-based) location	Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are.
android.permission.READ_SYNC_STATS	normal	read sync statistics	Allows an application to read the sync stats; e.g. the history of syncs that have occurred.
android.permission.WRITE_SYNC_SETTINGS	dangerous	write sync settings	Allows an application to modify the sync settings, such as whether sync is enabled for Contacts.
android.permission.INTERNET	dangerous	full Internet access	Allows an application to create network sockets.
com.google.android.providers.gsf.permission.READ_GSERVICES	dangerous	Unknown permission from android reference	Unknown permission from android reference
com.android.vending.BILLING	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.WRITE_CONTACTS	dangerous	write contact data	Allows an application to modify the contact (address) data stored on your phone. Malicious applications can use this to erase or modify your contact data.
android.permission.SEND_SMS	dangerous	send SMS messages	Allows application to send SMS messages. Malicious applications may cost you money by sending messages without your confirmation.
com.android.launcher.permission.INSTALL_SHORTCUT	dangerous	Unknown permission from android reference	Unknown permission from android reference
com.google.android.c2dm.permission.RECEIVE	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.GET_TASKS	dangerous	retrieve running applications	Allows application to retrieve information about currently and recently running tasks. May allow malicious applications to discover private information about other applications.
android.permission.WRITE_EXTERNAL_STORAGE	dangerous	read/modify/delete SD card contents	Allows an application to write to the SD card.
android.permission.MANAGE_ACCOUNTS	dangerous	manage the accounts list	Allows an application to perform operations like adding and removing accounts and deleting their password.
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.

com.whatsapp.permission.C2D_MESSAGE	signature	Allows cloud to device messaging	Allows the application to receive push notifications.
android.permission.AUTHENTICATE_ACCOUNTS	dangerous	act as an account authenticator	Allows an application to use the account authenticator capabilities of the Account Manager, including creating accounts as well as obtaining and setting their passwords.
com.whatsapp.permission.MAPS_RECEIVE	dangerous	Unknown permission from android reference	Unknown permission from android reference
android.permission.CALL_PHONE	dangerous	directly call phone numbers	Allows the application to call phone numbers without your intervention. Malicious applications may cause unexpected calls on your phone bill. Note that this does not allow the application to call emergency numbers.
android.permission.WRITE_SETTINGS	dangerous	modify global system settings	Allows an application to modify the system's settings data. Malicious applications can corrupt your system's configuration.
android.permission.READ_PHONE_STATE	dangerous	read phone state and identity	Allows the application to access the phone features of the device. An application with this permission can determine the phone number and serial number of this phone, whether a call is active, the number that call is connected to and so on.
android.permission.VIBRATE	normal	control vibrator	Allows the application to control the vibrator.
android.permission.ACCESS_WIFI_STATE	normal	view Wi-Fi status	Allows an application to view the information about the status of Wi-Fi.
android.permission.RECORD_AUDIO	dangerous	record audio	Allows application to access the audio record path.
android.permission.WAKE_LOCK	dangerous	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.CHANGE_WIFI_STATE	dangerous	change Wi-Fi status	Allows an application to connect to and disconnect from Wi-Fi access points and to make changes to configured Wi-Fi networks.
android.permission.RECEIVE_SMS	dangerous	receive SMS	Allows application to receive and process SMS messages. Malicious applications may monitor your messages or delete them without showing them to you.
android.permission.READ_CONTACTS	dangerous	read contact data	Allows an application to read all of the contact (address) data stored on your phone. Malicious applications can use this to send your data to other people.
android.permission.READ_PROFILE	dangerous	read the user's personal profile data	Allows an application to read the user's personal profile data.
android.permission.GET_ACCOUNTS	normal	discover known accounts	Allows an application to access the list of accounts known by the phone.

## MANIFEST ANALYSIS

ISSUE	SEVERITY	DESCRIPTION
Application Data can be Backed up [android:allowBackup] flag is missing.	medium	The flag [android:allowBackup] should be set to false. By default it is set to true and allows anyone to backup your application data via adb. It allows users who have enabled USB debugging to copy application data off of the device.
<b>Activity</b> (com.whatsapp.Conversation) is not Protected. An intent-filter exists.	high	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.

"dialog\_button\_more\_info" : "More info"  
"task\_killer\_info" : "There are three problems with 3rd party task killers.\n\nFirst  
on Android 2.1  
a task killer can PERMANENTLY kill WhatsApp. This causes you to LOSE messages that you would have otherwise expected to receive.\n\nSecond  
on all Android versions  
task killers can temporarily kill WhatsApp. This causes needless disconnects and reconnects to our server which DRAIN THE BATTERY of your device.\n\nThird  
on all Android versions  
if the task killer closes WhatsApp  
the WhatsApp server has no way of knowing that the connection has been closed. This means that message delivery will be impacted. Rest assured the message will be delivered but it could be DELAYED BY SEVERAL MINUTES as a result.\n\nFor these reasons  
we recommend that you delete your 3rd party task killer.\n\nSpecifically  
WhatsApp checks for:\n\nAdvanced Task Killer by ReChild\nAdvanced Task Manager by Cyrket / Arron\nTaskKiller by Cyrket / Arron\nTask Manager by Adao\n\nIn Android 2.1 and later versions  
the need for a task killer is greatly diminished.\n\nIf you really want to take the risk  
we STRONGLY recommend that you add WhatsApp to the ignore list of your task killer. Please also understand that task killers are not supported by WhatsApp and that you use them at your own risk."  
"custom\_rom\_info" : "Custom ROMs have been known to cause problems with keyboard input methods  
cloud to device (C2DM) notifications as well as timely and accurate message delivery. Further  
many custom ROMs are bundled with task killing properties that cause the same problems as a 3rd party task killer. Please understand that custom ROMs are not supported by WhatsApp and that you use them at your own risk."
